PROJECTS

Hostel and Mess Management System

2024

Bhubaneswar, India

A project aimed at facilitating the management of hostel and mess operations effectively.

- Designed and implemented a comprehensive system for managing hostel and mess operations using React and MongoDB.
- Enhanced data management efficiency by 30% and provided a seamless user experience.
- Developed RESTful APIs using Node.js and Express, tested thoroughly using Postman.
- Utilized Postman collections for API documentation.
- Ensured seamless integration of frontend and backend by testing API endpoints for CRUD operations.

Interactive Rating Card Component

Bhawanipatna, Odisha

2023

A project showcasing user interaction and dynamic DOM updates.

- Features include selecting and submitting a number rating and displaying a "Thank you" card state upon submission.
- Implemented hover and focus states for all interactive elements.
